

CENTRAL WESTCOAST FOREST SOCIETY

WINTER SPEAKER SERIES

Ucluelet Community Centre - Doors at 6:30, Show at 7:00 - Admission by Donation

Co-Existing With Carnivores - Separating Facts from Fiction : Todd Windle

Thursday, January 12th

Human-wildlife conflicts are complex, socio-ecological challenges that require multi-faceted solutions. Come out and learn about factors contributing to conflicts between people and large carnivores here on the west coast and what we can do to help foster co-existence.

Thursday, February 9th - No Talk

SIMRS - Research, Monitoring, & Education in Clayoquot Sound : Jessica Edwards

Thursday, March 9th

Strawberry Isle Marine Research Society has been conducting environmental monitoring in Clayoquot Sound since 1991. Our goal is to create long-term monitoring programs, to inspire public involvement in local research, and to promote public awareness of this incredible place we call home.

Bones, Beaks and Teeth, a Comparative look at Skeletons : Becky Wigen

Thursday, April 13th

This is a hands-on look at skulls from a variety of local birds and mammals with a focus variations in teeth and bill shape and how those relate to diet. In addition, if you have found bones and don't know what they are, bring them along, as they can probably be identified.

Ecology of Salmonids in Estuaries Around the World : Dr. Colin Levings

Thursday, May 11th

Based on my recent book, the talk will present an overview of our current knowledge of how sea-run salmonid species (salmon, steelhead, char, and trout) around the world are adapted to estuaries. I will also discuss the various types of estuaries found in Canada and elsewhere and relate their habitats to conservation of salmonids and their supporting ecosystems.
